Skills

Languages C, C++, Java, JS, TS, PHP, SQL
Frontend HTML/CSS, React.js, Vue.js, Next.js, Tailwind CSS, TanStack Query, Redux Toolkit, Shadcn
Backend Nest.js, Node.js, Express.js, REST, GraphQL, gRPC, Socket.io
Databases PostgreSQL, MySQL, MongoDB, Redis
Messaging RabbitMQ, Kafka

Cloud AWS (EC2, S3, RDS, IAM, Pipeline), GCP, Cloudinary
DevOps Docker, Kubernetes (K8s), GitHub Actions, ArgoCD
Testing Jest, Mocha, Vitest
Tools Webpack, Babel, Vite, ESLint, Prettier, pnpm, Zod

Experience

Wipro Dec 2025 – Present

Senior Software Engineer (SSE)

- Developed the **BFF** layer for telecom-related products using **Node.js** and **TypeScript** within a **pnpm** mono-repo, powering the new multibrand simpel.nl shop.
 - Architected a centralized, shared domain using **NestJS** and **Redis** to handle multiple brands under the Odido portfolio, leveraging **Zod** for strict data validation and **oRPC** for type-safe cross-service communication.
 - Streamlined deployment pipelines and managed cloud infrastructure utilizing **ArgoCD** and **AWS**, ensuring high availability and fault tolerance for consumer-facing platforms.
- Client: Odido NL (formerly TMNL)

Ailoitte Feb 2025 – Nov 2025

Senior Software Engineer (SSE)

- Developed comprehensive system documentation including **tech stack evaluations**, **POCs**, **architecture designs**, and **cost analysis**, ensuring scalable and cost-effective solutions.
 - Led module development and integrated **AI-driven recommendation features** with LangChain, improving functionality and user experience.
 - Mentored junior and mid-level developers through code reviews and best practices, and conducted technical interviews to strengthen the team.
- Clients: Mana, Communicate, Kargone

HMR Technologies Aug 2021 – Jan 2025

Software Developer Engineer (SDE)

- Built full-stack applications with **MERN** and **Nest.js**, which improved code readability and reduced maintenance effort.
 - Used **Vite** and **esbuild**, cutting build times and making deployments faster.
 - Implemented **JWT/OAuth2** authentication with **RBAC & ABAC**, improving security and flexible access control.
 - Optimized APIs, which lowered response times and reduced server load.
 - Integrated AWS services (**S3**, **EC2**) and automated deployments, reducing manual setup time and increasing reliability.
 - Establishing common standards and enhancing development strategies to improve project delivery timelines and quality in a service-based environment.
 - introduced coding standards and better workflows, helping teams deliver projects quicker and with fewer errors.
- Clients: Seedsuite, Gimma, Biblo

Omeechron Solutions Aug 2018 – Aug 2021

Full Stack Developer

- Developed backend systems using **Node.js** and **Laravel**, improving API efficiency and server response times.
 - Built dynamic frontend interfaces with **React** and **vanilla JavaScript**, enhancing user experience.
 - Optimized **MySQL** and **PostgreSQL** queries, improving database performance and reducing latency.
 - Integrated **AWS S3** and **EC2** for file storage and server hosting, reducing manual deployment overhead.
 - Integrated third-party services like **Stripe** and **SendGrid**, enabling payments and email notifications.
 - Automated basic deployment scripts using **bash** and **cron jobs**, cutting repetitive tasks and downtime.
 - Migrated legacy **PHP** applications to **Laravel**, improving maintainability and security.
- Clients: Brisco Production, ClearIT

Education

GTU

Bachelor of Engineering in Information Technology(2014-2018)

Certifications

- 🌟 DSA & System Design - Heycoach
